Date: **March 20, 2000**

Subject: **WRITING PROGRAMS INTO RAMs**

Model: **BVM-D14H1E, BVM-D14H1U**
BVM-D14H5E, BVM-D14H5U

Serial No: **ALL**

DESCRIPTION

When upgrading firmware, if the memory card for a version upgrade contains other files in addition to the program file, the upgrade may not be successfully completed. Even if the memory card is removed, the unit may fail to start up and the STANDBY LED may blink at one second intervals.

To prevent such an error from occurring, do *not* write a file other than the version upgrade data into the memory card when performing a firmware upgrade.
